ARTICLES

A

Aluminium and its Alloys in 1955. By E. Elliott 69–79
Aluminium and its Alloys, British Standards for. The 1955 Revisions. By E. Elliott 108–112, 157–162
Aluminium Alloys, The Interactions of Static Stress and Corrosion with. By Dr. F. A. Champion 63–68
Aluminium Alloys, Trends in the Welding of. By P. T. Houldcroft 80–83
Aluminium Cable Installation. Use of Light Metal for Sheath and Core 18–20
Aluminium Cladding, Extensive Use of, at the new Marchwood Power Station 198–199
Aluminium Finishes for Exterior Use. By J. C. Bailey and W. Evans 57–62
Annealing, Tool Steel. New Facilities for Arthur Balfour & Co., Ltd. 34–36
Automatic Heat Treatment of Coiled Brass Strip 223–224

B

Bessemer Process, The Invention of the. Mr. James Mitchell's Centenary Lecture 243–248
Blast Furnace (New) at Margam Works 83
British Oxygen Technical Service Department Move 117–118
British Standards for Aluminium and its Alloys—The 1955 Revisions. By E. Elliott .. 108–112, 157–162

C

Cable Installation, Aluminium. Use of Light Metal for Sheath and Core 18–20
Ceramics and Metals Laboratory, New U.S. 163–166
Cladding (Aluminium), Extensive Use of, at the New Marchwood Power Station .. 198–199
Coiled Brass Strip, Automatic Heat Treatment of 223–224
Cold Strip Mill (New Tandem) at Ebbw Vale 139–142
Commonsense, Science, and Good Management in Industry .. 217–221
Composition and Reduction of Oxide Films on Copper. By Dr. R. F. Tylecote 191–197
Copper and Copper Alloys. A Survey of Technical Progress during 1955. By Dr. E. Voce 103–107, 143–152
Copper, Low-Temperature Fatigue Testing of 212–213, 216

Page

Copper, The Composition and Reduction of Oxide Films on. By Dr. R. F. Tylecote 191–197
Coreless Induction Melting Furnace, Mains Frequency 99–102, 171–174
Corrosion and Static Stress (The Interactions of) with Aluminium Alloys. By Dr. F. A. Champion 63–68
Cort, Henry. Wrought Iron Pioneer. By E. N. Simons .. 27–29

D

Diesel-Electric Locomotive, New 400 h.p. 222–223
Die Steels, Hot Work 119–121
Drip Feed Technique, Gear Hardening by 25–26

E

Electrical Plant for the Metal Industries 113–116, 167–170
Electrodeposition of Tungsten, The. By Dr. G. L. Davis and C. H. R. Gentry 3–17
Electromagnetic Pumps for Liquid Metals 277–278

F

Fatigue Failure, An Unusual. By E. Wood 278–279
Fatigue Testing (Low-Temperature) of Copper 212–213, 216
Foundry Moulding Techniques, A Practical Comparison of the Effectiveness of Sand Compaction by Several. By Dr. D. H. Houseman 249–252
Fuel Oil Applications, New .. 200–202, 221
Furnace Installations, Recent Heat Treatment 257–275

G

Gear Hardening by Drip Feed Technique 25–26

H

Hardening (Strain-Age) of Mild Steel. By Dr. B. B. Hundy .. 203–211
Heat Treatment (Automatic) of Coiled Brass Strip 223–224
Heat Treatment Furnace Installations, Recent 257–275
Hot Work Die Steels 119–121

I

Indian Iron and Steel Works, New 214–216
Induction Melting Furnace, Mains Frequency Coreless .. 99–102, 171–174
Industry: Science, Commonsense and Good Management in 217–221
Institution of Metallurgists' Presidential Address 254–256
Iron and Steel Institute. Mr. James Mitchell's Centenary Lecture on "The Invention of the Bessemer Process" .. 243–248

J

Janus, Yorkshire Engine Company Introduces the 222–223

Page

L

Liquid Metals, Electromagnetic Pumps for 277–278
Low-Temperature Fatigue Testing of Copper 212–213, 216

M

Mains Frequency Coreless Induction Melting Furnace 99–102, 171–174
Management (Good), Science and Commonsense in Industry .. 217–221
Marchwood Power Station, Extensive Use of Aluminium Cladding at the New 198–199
Melting Furnace, Mains Frequency Coreless Induction .. 99–102, 171–174
Metal Industries, Electrical Plant for the 113–116, 167–170
Metal Powders, Sheath-Working of 31–33
Metals and Ceramics Laboratory, New U.S. 163–166
Metals and Metallurgists, The Future for. Mr. G. L. Bailey's Presidential Address to the Institution of Metallurgists .. 254–256
Mild Steel, The Strain-Age Hardening of. By Dr. B. B. Hundy 203–211

N

Nickel-Plating and Research. Some Aspects Reviewed in the Hothersall Lecture 240
N.P.L. Open Day 275–276

O

Oil Firing, New Industrial Applications of 200–202, 221
Oxide Films on Copper, The Composition and Reduction of. By Dr. R. F. Tylecote .. 191–197

P

Penetration Testing, Sand Mould. By Dr. D. H. Houseman, Dr. D. V. Atterton and Dr. T. P. Hoar 21–25
Penetration Testing, Sand Mould. II—A Practical Comparison of the Effectiveness of Sand Compaction by Several Foundry Moulding Techniques. By Dr. D. H. Houseman .. 249–252
Powders (Metal), Sheath-Working of 31–33
Pumps (Electromagnetic) for Liquid Metals 277–278

R

Ramming of Sand Moulds—A Simple Laboratory Apparatus for Estimating the Resistance of Sand Moulds to Penetration by Molten Metal. By Dr. D. H. Houseman, Dr. D. V. Atterton and Dr. T. P. Hoar 21–25
Reduction and Composition of Oxide Films on Copper. By Dr. R. F. Tylecote 191–197
Research and Nickel-Plating. Some Aspects reviewed in Hothersall Lecture 240

Page

S

Sand Compaction by Several Foundry Moulding Techniques. A Practical Comparison of the Effectiveness of. By Dr. D. H. Houseman 249–252
Sand Mould Penetration Testing. By Dr. D. H. Houseman, Dr. D. V. Atterton and Dr. T. P. Hoar 21–25
Sand Mould Penetration Testing. II—A Practical Comparison of the Effectiveness of Sand Compaction by Several Foundry Moulding Techniques. By Dr. D. H. Houseman .. 249–252
Science, Commonsense, and Good Management in Industry .. 217–221
Sheath-Working of Metal Powders 31–33
Standards (British) for Aluminium and its Alloys. The 1955 Revisions. By E. Elliott .. 108–112, 157–162
Static Stress and Corrosion (The Interactions of) with Aluminium Alloys. By Dr. F. A. Champion 63–68
Steels, Hot Work Die 119–121
Strain-Age Hardening of Mild Steel. By Dr. B. B. Hundy.. 203–211
Strip Mill (New Tandem Cold) at Ebbw Vale 139–142

T

Tandem Cold Strip Mill (New) at Ebbw Vale 139–142
Thorium, The Production of .. 253–254
Tool Steel Annealing. New Facilities for Arthur Balfour & Co., Ltd. 34–36
Tungsten, The Electrodeposition of. By Dr. G. L. Davis and C. H. R. Gentry 3–17

U

U.S. Metals and Ceramics Laboratory, New 163–166

V

Ventilating Machines, The Development of. By Dr. P. F. Holt 153–156

W

Welding of Aluminium Alloys, Trends in the. By P. T. Houldcroft 80–83
Wrought Iron Pioneer—Henry Cort. By E. N. Simons .. 27–29

Z

Zinc Development Association's New Offices 121

CORRESPONDENCE

Cast Iron, The Solidification of. G. Erber and W. G. Williams.. 84–85
Heat Resistance and Applications of Hot Dip Aluminised Steel, The. Sheila M. Holgate and M. L. Hughes 30
Hot Dip Aluminised Steel, The Heat Resistance and Applications of. Sheila M. Holgate and M. L. Hughes 30
Isolation of Silicon Nitride from a Commercial 4% Silicon Steel. H. A. Sloman 135–136
Plotting of Inverse Rate Cooling Curves. E. F. Maillard and L. H. Cope and F. Kellett .. 135
Spectrographic Electrode Holder. J. Hickford (Miss) 135

Page

METALLURGICAL DIGEST

Molybdenum Disilicide for High Temperature Service 175

LABORATORY METHODS

Aluminium Alloys, Reproducibility in the Spectrographic Analysis of. By F. H. Smith.. 237–240
Analysis (Visual) a New Spectroscope for. By R. H. Tyas.. 285–288
Antimony, The Photometric Determination of, in Tin and Tin-Lead Solder with Rhodamine B. By W. C. Coppins and Dr. J. W. Price 183–184
Autoradiography, High Resolution 48–49
Cambridge Instrument Co., Ltd. Polarographic Research Laboratory 53
Carbon in Iron and Steel, A Semi-Micro Method for the Determination of. By P. H. Scholes 129–131

Page

Chromium, Nickel and Molybdenum, Determination of, Using the Spekker Absorptiometer. By. J. Winning and S. Miller 50–52
Cobalt Alloy (Sintered), Electropolishing and Electro-etching a. By E. R. Perry.. 231–233
Copper Alloys, The Determination of Zinc in. By B. Chew and G. Lindley 45–47
Electro-polishing and Electro-etching a Sintered Cobalt Alloy. By E. R. Perry .. 231–233
Hardness Testing, An Oblique Illuminator for Use in. By S. A. Dunk 289–291
High Resolution Autoradiography 48–49
Illuminator (Oblique) for Use in Hardness Testing. By S. A. Dunk 289–291
Inorganic Analysis, Liquid-Liquid Extraction Procedures in. By Dr. T. S. West 91–96, 132–134, 185–188, 234–236, 240, 292–294
Inverse-Rate Cooling Curves, A Simple Device for Plotting. By L. H. Cope and F. Kellett 54
Iron and Steel, A Semi-Micro Method for the Determination of Carbon in. By P. H. Scholes 129–131
Liquid-Liquid Extraction Procedures in Inorganic Analysis. A Review of Practical Applications with particular reference to Metallurgical Analysis. By Dr. T. S. West .. 91–96, 132–134, 185–188, 234–236, 240, 292–294
Metallurgical Analysis: Liquid-Liquid Solvent Extraction Techniques in Inorganic Analysis, with particular reference to. By Dr. T. S. West 91–96, 132–134, 185–188, 234–236, 240, 292–294
Molybdenum, Nickel and Chromium, Determination of, Using the Spekker Absorptiometer. By J. Winning and S. Miller.. 50–52
Nickel, Chromium and Molybdenum, Determination of, Using the Spekker Absorptiometer. By J. Winning and S. Miller 50–52
Oblique Illuminator for Use in Hardness Testing. By S. A. Dunk 289–291
Photometric Determination of Antimony in Tin and Tin-Lead Solder with Rhodamine B. By W. C. Coppins and Dr. J. W. Price 183–184
Physical Society Exhibition, Exhibits of Metallurgical Interest at the 52–53
Polarographic Research Laboratory—Cambridge Instrument Co., Ltd. 53
Reproducibility in the Spectrographic Analysis of Aluminium Alloys. By F. H. Smith .. 237–240
Rhodamine B, The Photometric Determination of Antimony in Tin and Tin-Lead Solder with. By W. C. Coppins and Dr. J. W. Price 183–184
Semi-Micro Method for the Determination of Carbon in Iron and Steel. By P. H. Scholes.. 129–131
Sintered Cobalt Alloy, Electropolishing and Electro-etching a. By E. R. Perry 231–233

Page

Solvent Extraction Techniques (Liquid-Liquid) in Inorganic Analysis, with particular reference to Metallurgical Analysis. By Dr. T. S. West 91–96, 132–134, 185–188, 234–236, 240, 292–294
Spectrographic Analysis of Aluminium Alloys, Reproducibility in the. By F. H. Smith 237–240
Spectroscope (A New) for Visual Analysis. By R. H. Tyas .. 285–288
Spekker Absorptiometer, Determination of Nickel, Chromium and Molybdenum using the. By J. Winning and S. Miller.. 50–52
Tin and Tin-Lead Solder with Rhodamine B, The Photometric Determination of Antimony in. By W. C. Coppins and Dr. J. W. Price 183–184
Visual Analysis, a New Spectroscope for. By R. H. Tyas .. 285–288
Zinc in Copper Alloys, The Determination of. By B. Chew and G. Lindley 45–47

NEWS AND ANNOUNCEMENTS

A.E.I. Lamp and Lighting Co., Ltd. 226
Alcan, Full Production at .. 199
Alloy Castings Venture 282
Aluminium Capacity in India, Expansion of 136
Aluminium Hand Forgings, Two Ton 107
Aluminium Houses for Colombia 17
Aluminium Plant Alarm 224
Aluminium Ship, Hungary to Build 156
Aluminium, South American .. 134
Aluminium Stamp, Hungarian.. 188
American Electric Steel Capacity 166
Applied Mechanics Congress .. 176–177
Australian Order (New) for Davy-United 226
Automatic Laboratory Film .. 124
Babcock & Wilcox, Ltd., Form New Division 224
Beilby Memorial Awards, 1955.. 124
Bessemer Centenary 280
Birlec Equipment at Kirkby .. 37–38
Birlec, Export Order for 291
Birthday Honours List 242, 248
Blast Furnace (New) at Margam Works 83
British Commonwealth Welding Conference 225
British Oxygen New Works for Dundee 282
British Standard, Revised .. 85
Brown, David, Industries, Ltd. 188
Cadmium Poisoning, Insurance Against 178
Canadian British Aluminium Co., Ltd. Contracts placed in this country for electric conversion equipment valued at over £2¼ million 177
Capper Pass Awards 87, 177
Coke Oven Plant Order 178
Computing Service (New) in London 211
Corrosion Prevention in Packaging and Storage, Symposium on 123
Davy-United 178, 226, 233
Degussa Agreement—National Research Corporation 33
Drip Feed Technique, Gear Hardening by 25–26
Electric Steel Capacity, American 166

Page
